

## CCCC Blackboard Learn™ Mobile Device Compatibility Chart

The chart below provides guidance on which mobile devices are currently compatible with Blackboard Learn 9.0. The most commonly used features are listed below and are designated with a Yes or No for their reliability when used with each device. If you have additional questions, please contact the distance education department at [destaff@cccc.edu](mailto:destaff@cccc.edu).

Blackboard Features	Netbook	iPad®	iPhone®	Android®	Blackberry®
<b>Announcements</b>	Yes	Yes	Yes	Yes	Yes
<b>Items with text</b>	Yes	Yes	Yes	Yes	Yes
<b>Microsoft Word™ document</b>	Yes	Yes	Yes	No	No

<b>Discussion Board</b>	Yes	Yes	No	Yes	Yes
<b>Blog</b>	Yes	Yes	No	Yes	Yes
<b>Journal</b>	Yes	Yes	No	Yes	Yes

\* While the testing features may work on a mobile device, the most reliable way to take a test is on a wired network. We recommend your home computer, a library, or a computer lab. Mobile networks can be spotty, especially if you are traveling while taking your test and could cause you to lose your signal. A lost signal could cause you to get locked out of your test and student responses would not be saved. Please keep this in mind when planning for assessments in your course(s).
