

LIBRARY AND INFORMATION TECHNOLOGY

ABOUT THIS PROGRAM

Students enrolled in the Library and Information Technology program will develop professional skills that prepare them to work in a library setting in a number of different areas. The program covers all main types of library work including public services functions such as circulation and reference, and technical services functions such as cataloging and collection development. Classes in the program have a heavy emphasis on the technology and technical skills necessary to successfully work in modern libraries, including database searching, online public access catalogs, assisting technology, social media, apps, and more.
