ABOUT THIS PROGRAM

Students enjoy many hours in our modern, well-equipped shop learning by the use of a hands-on approach. From instructional materials, they take basic knowledge and develop skills for successful careers in the motorcycle industry. Students are prepared to inspect, diagnose, repair and adjust motorcycles and ATV's. Instruction goes beyond a basic understanding of the operating principles, with numerous shop assignments and practices along with demonstrations. Almost every graduate of the Motorcycle Mechanic program has a job lined up within a week of graduation. The demand for skilled motorcycle mechanics is high locally and throughout the nation.
